(Indicate if building or structure is in an historic district)

Porter Avenue has large houses built close together with many being excellent examples of Victorian Architecture. Porter Avenue connects Front Park to Symphony Circle.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

French Romanesque style church. Gable roof. Gabled central bay has round arched entrance with molding surround. Double glass and wood paneled doors with paneled sidelights. Stain glass tympanum with quatrefoil tracery. Rosette window with surround. Eyebrow window head with dentils underneath. Round arch window in gable. Dentils under cornice. Three story towers flank central bay. Round arched side aisle entrances. Double wood and glass paneled doors. Stain glass tympanum. Pair

SIGNIFICANCE round arched window above with diamond shape lights. Stone belt course

19. DATE OF INITIAL CONSTRUCTION: c. 1856-7

ARCHITECT \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

18 cont'd second floor round arched louvre window. Eyebrow window head. Third floor has pair round arched louvre windows with eyebrow window head. Engaged arcade below roof eave. Polygonal front roof with cross topping. Tower ends have turrets with polygonal roof and crocket. Steel frame tile floors.

20. Excellent example of church with styling derived from French Romanesque Style. Transept and choir added in 1872. Rev. D. Riordan was pastor in 1889-91 during his administration the church was improved and decorated and the towers renewed. The church was run by oblate missionaries of Mary Immaculate, a religious congregation founded in early part of the 19th century by the Rev. Charles Joseph Eugene De Mazenod, who became bishop of Marseilles.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
 Two story frame with Eastlake Styling. Gable roof. Front gable has round arch panel with round cut-out pattern spindles, kingpost, cross bar and brackets. First and second floor have two over two light windows with pediment head having cut-out patterns. Front wood paneled doors with single lights. Front porch has squared columns round arched cut-out pattern in frieze and spindle balustrade.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: c. 1888

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Excellent example of a frame house with Eastlake Styling. Many houses in the area had similar styled porches and gable trim but have had them removed when the facades of the houses were modernized. Mr. and Mrs. George V. Voss lived here in 1888. George Voss was with Henry Smith Co., builders, carpenters and joiners at 250 and 36-40 Washington. Normal Avenue was called Thirteenth St. in 1894.

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:

(Indicate if building or structure is in an historic district)

Among residential and commercial buildings on Connecticut Street, a main thoroughfare for the surrounding Italian community.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
 One story with Gothic Revival Styling. Gable roof. Gabled projecting bay has large Gothic arched window. Multi-light lower light with tympanum having Gothic arch and medallion tracery. To left is twelve light wood paneled door. Gothic arched window to right has eyebrow window head. Round window with surround above gabled bay.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION \_\_\_\_\_ c. 1878

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:  
 Excellent example of structure utilizing Gothic Revival Styling. In 1925 this house was thw Gospel Tabernacle Christian Missionary Alliance. Later it was a furniture repair shop. Mr. William Goerge Doorty and his wife Lillian Wade Jackson Doorty lived here in 1887. Doorty was born in Chippewa, Ont. on Aug. 6, 1858. His family moved to Buffalo while he was a child. In 1880 he was admitted to the bar in Buffalo. Doorty was recognized as an outstanding authority on abstract titles and mortgages. He died on April 30, 1932 at the age of 74.

17 INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS

(Indicate if building or structure is in an historic district)

**Among late Victorian homes (period 1880-1890). Built over the site of an early settlers cemetery, the Black Rock Burial Grounds. Located in Symphony Circle, dedicated in 1958 in tribute to Buffalo Philharmonic Orchestra.**

- 18 OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
**Three story Victorian Chateausque Style with French feudal appearance. Rusticated stone porch with low hip roof has massive stone Doric supports with decorated fan brackets. First floor bay supported by arches has tripart window and entablature, flanked by small windows with rusticated sill and lintel. Rusticated stone belt course. Second floor bay**  
 SIGNIFICANCE **flanked by small rectangular windows with stone**

19 DATE OF INITIAL CONSTRUCTION

**c. 1890**

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20 HISTORICAL AND ARCHITECTURAL IMPORTANCE.

**18 cont'd lintels. Pediment-like gable supported by corbeled brackets. Common lap shingles. Palladian type window in gable. Dormers have gable roofs with flared ends, modillions under the eaves. Double hung single light windows. Left side facing Symphony Circle has three story tower with pagoda-type roof. Flat headed windows on first and second floors with rusticated lintel. Circular windows on third floor. Entrance to left of tower has glass paneled door with side-lights and continuous multi-light transom. Four part wingle light windows flanked by rusticated Doric pilaster strips. Rusticated lintel.**

22. THE ME.

**Residential**

20. Excellent example of Chateausque Style with French feudal appearance. Original residence of Captain Thomas Maytham, who built the house in the 1890's. Maytham came to Buffalo in 1862 and made his fortune in shipping. Thomas Maytham and his brother Edward C. had extensive shipping interests which included sailing vessels, steamers, and Maytham Tug Line. They built adjoining homes at Richmond and the Circle. The houses were separated by double walls with the exception of the tower rooms on the third story. There, the dividing was single. Mrs. Ray G. Strong, Lillian of Medina, daughter of Edward Maytham, used to throw a book at the wall to call her cousins to the window for conversation.

In the interior such rare woods as sycamore and California redwood were used. The dining rooms have beamed ceilings and are paneled in redwood. The woodwork of the spacious living room originally was enameled white and decorated with gold leaf.

The brothers kept their horses at Whites livery stable on neighboring Jersey Street. Edward's horse made a name for itself in the well remembered races on Richmond Avenue, in which prominent Buffalonians used to participate.

Thomas Maytham died in 1893 shortly after his home was completed. He was survived by his wife, a daughter Minnie, who became Mrs. William Barton and four sons, William Edward, Walter, who was an executive of Portland Cement Company, and Frank, who was assistant Attorney General of California.

After Thomas Maytham's death, two other men of exceptional ability occupied the home he built. They were the late Herbert D. White, whose lumber interests in North Tonawanda were extensive, and Edward L. Hengerer, son of the founder of William Hengerer Company and former executive of that merchandising firm.

In 1921 it became the E. Nathan Home for aged and infirm women. Presently it is the Philharmonic House.

18 cont'd door. Roof eaves have modillions and dentils.

20. Excellent example of the Colonial Revival Style. Dr. Lawrence G. Hanley and his wife, Mary Agnes Walsh Hanley lived here in 1901. Dr. Hanley died in this house on May 22, 1945. He was 82 years old. Porter Avenue was once a prestigious residential street but many of the houses have since been split up into apartments or rooms. Porter Avenue was named for Peter Buell Porter veteran of the War of 1812, secretary of State in the cabinet of President John Quincy Adams, a member of the committee which made the original survey for The Erie Canal. At one time Porter and his brother Augustus owned virtually all the river front. Porter Ave. was the city line in 1852, the street was incorporated into El Olmsted's city park plan, as being a link between Front Park and The Circle.

18. continued----- arched windows with relieving arch. Third floor has straight headed windows with eyebrow window heads. Square towers have slender windows. Crennelated parapet. Roof supported on steel arched truss sprung from side piers separate from walls. 115' above floor, raised 5' sidelight.

20. Unique styled building in the city of Buffalo. This "Romantic Pseudo-castle" armory occupies a full city block and massive stone block construction. It faces Prospect Park, a green space that also extends for a full city block. The construction was supervised by Albert Berrick of Charles Berrick and Sons, who also supervised the construction of the old public library, the Historical Society, St. Louis Church, Old Tech Theatre, and the Old Iroquois Hotel at Main and Eagle Streets. Berrick resided at 147 Linwood Avenue. This was the site of a reservoir, in 1891.

18. continued--- End rusticated piers with egg and dart molding decorating. Entablature has dentils under cornice decorated with running dog molding. Third and fourth floor over entrance have second floor Ionic fluted pilaster strips with vermiculated bands. Center bay has paired straight headed windows with egg and dart surround. Panels decorated with naturalistic foliate forms. End projecting bays over entrance have single window. Entablature decorated with wave motifs in frieze, dentils under cornice and acanthus leaf cornice. Topping cornice are urns with drapery design and cherub heads. Fourth floor center bay has broken pediment with eagle decorating center. Paired straight headed windows with egg and dart surround. Ionic pilaster strips decorated with panels of palm leaves. Capitals have cherub heads. Entablature has bay leaf molding in frieze and egg and dart molding under cornice and raking cornice. Pedestal of eagle decorated with festoon and lion's head. Third floor vermiculated with paired straight headed windows, dentils under cornice decorated with fret molding. Fourth to Seventh floors are rusticated with round arched panels. Fourth to Sixth floors have straight headed windows with radiating voussoirs, and straight arch, and petal shape decoration mullion. Seventh floor has quarter light windows with keystone, and dentils under cornice decorated with egg and dart motif. Eighth to Ninth floors have rusticated piers, and round arched panels. Eighth floor has straight headed windows with voussoirs. Ninth floor has round arched windows. Round arches topping piers decorated with rosettes, egg and dart molding and keystone. Banded bay leaf garland tops ninth floor. Tenth floor has straight headed windows with egg and dart surround. Piers decorated with foliate forms and grotesques. Ends of piers decorated with cherub molding and coat of arms. Cornice decorated with egg and dart molding. Dentils. Parapet with fluting. Roof cresting has egg and dart motif, female heads, and wave molding. Fire proof construction except exposed steel in attic, concrete and tile arch floors, tile roof, tile and gypsum partitions, 12" brick curtain walls; suspended W.L.&P ceiling on 10th floor. Glass roof in lobby. Penthouse on roof.

20. Outstanding example of Beaux Arts Classicism. The Ellicott Square building is the best example of this style in the city of Buffalo. When it was first built, the Ellicott Square Building was the largest office building in the world. The architect, Daniel H. Burnham, was assisted in the design of the building by Charles Atwood, who was a partner in his firm. The architectural firm of Burnham and Root had an important role in the evolution of the Chicago School. "Their best known buildings are the Monadnock Block (1889-91), still a load bearing masonry structure, though severely direct and unornamented, the Masonic Temple (1891), with its twenty-two stories, the tallest building in the world at the time it was built, and with a complete steel skeleton; and the Flatiron building in New York City (1902). Burnham was made Chief of Construction for the World's Columbian Exposition in Chicago, which took place in 1893. The most monumental of them were classical and columnar, and this demonstration of Beaux Arts ideals cut short the life of the Chicago School. Later Burnham concentrated more and more on town and area planning. His plans for the District of Columbia (1901-2) are the start of comprehensive town planning in America. They were followed by the plan for Chicago (1906-9) and many others."<sup>1</sup>

Burnham's superintendant for construction of the Ellicott Square Building was Paul Starret. W.B. Wilson was the contractor for the foundations. Ellicott Square is 10 stories plus the attic; has 500,000 S.F., and cost \$3,350,000; including the site. The structure provides for the addition of ten stories; interior court dimensions are 110 feet by 70 feet with a glazed skylight. The primary original owner was John N. Scatterd. The Buffalo Law School of the University of Buffalo was here from 1896 to 1913. The Young Men's Christian Association was originally on this site. Ellicott Square was named after Joseph Ellicott who was the land agent for the Holland Land Co. , and who laid out the original street plan for what is now the downtown section of the City of Buffalo.

Belt course. 7th floor windows echo this. Crowning cornice. Steel frame, 12" brick and terra cotta, 4" tile partitions.

20. see attached sheet. 21. Buffalo Architecture.... J. Randall, pg. 98.  
22. Commercial

Niagara Mohawk Building—75-3

20. Steel frame with reinforced concrete with an exterior of terra cotta. Interior has bronze and Honduras mahogany. The ground floor rotunda is finished in Buttrichino marble.

Surmounting the 18 stories of the tower is an observation promenade, 170 feet above the street. In the section above this is an electrical laboratory 32 feet in height, this surmounted by a second observatory promenade. In the dome is a turntable, 10 feet in diameter, on which are mounted three search lights, which are visible on clear nights for a distance of 70 miles. The whole tower is illuminated at night.

The dimensions of the building for the first four stories are 182 feet. The General Electric Company will use the basement, the first floor the mezzanine and the second floor. The offices of the floors above this will be rented to desirable tenants. The thirteen story tower was patterned after the "Tower of Light" building at the Buffalo Pan-American Exposition in 1901. Building was originally called the General Electric Tower. The Seven story section to the east was built in two stages; the first four stories were built in 1924 with a three story addition built in 1927. The Niagara Mohawk Company is one of the oldest in Buffalo, including among the antecedent companies the Oswego Canal Company, c. 1824; Gruener's Hotel previously occupied the site.

John Gill and Sons was the builder.

75-20

1-15 Genesee Street  
The Genesee Building

20.

Excellent example of a high rise office building with Italian Renaissance Styling. The triangular shape of the building is a result of the Joseph Ellicott street plan which consists of streets radiating from Niagara Square. (Genesee Street was cut off from Niagara Square with the construction of the Convention Center.) The Genesee Building opened in 1923, and was built by Norman Clement and Shelton Weed. The architects, Green and Wicks, were one of Buffalo's most prominent firms. Merrel Clement was an associate architect for the building. Contractors for the building included: Acme Shale Brick Co., Shale Brick and Hollow Tile, D.E. Kennedy Inc. (N.Y.C.). The Clements and the Weeds owned the building until 1948, when its ownership went first to the General Realty and Utilities Corp. of New York, then to the Massachusetts Mutual Life Insurance Co., then back to General Realty. In 1958 it was sold to Mr. Lamont DuPont of Wilmington, Delaware. Leon Lawrence Sidell bought the building in 1962.

Buffalo Savings Bank located across the street. Theodore Roosevelt Plaza and Genesee St. are to the southeast. Among retail commercial buildings of Main St.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE. (including interior features if known):  
 four story art deco style. flat roof. First floor storefronts have recessed entrances. Double glass paneled door with transom. Left has rounded window with metal hood spanning building. Second floor smooth concrete with no surface ornamentation. Rounded corner. Large rectangular panel with horizontal bands of windows.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: c. 1930

ARCHITECT: Alfred S. Alshuler and R. Loewy

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:  
 Excellent example of the Art Modern Style. This building is the best example of the style in the City of Buffalo. Building was vacated when Grants went out of business in 1978.  
 This building was highlighted by John McAndrew in his book, Guide to Modern Architecture, Northeast States, Museum of Modern Art, 1940.  
 When Henry Russell Hitchcock surveyed Buffalo in 1940 for the high points in architecture he made note of the W.T. Grant building and said "the design of the building) set this building apart as the only example of consciously modern design in Buffalo."

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

18. continued— and "Buffalo Savings Bank" carved in frieze in three spots. Entrance at southwest corner has metal and glass revolving door with grill work above, and round arched transom with keystone. Window above doorway has balcony with spindle balustrade, and brackets beneath. Clock in third floor over entrance has elaborate cartouche, scroll, and foliate carved surround. 2nd and 3rd floors are stepped back with each floor having pilasters, and raked cornice, inscription in 2nd floor "Incorporated May IX, A.D., MDCCLXVI, ERRECTED A.D. MDCCLXIX." Fire proof construction except exposed steel in both inner dome over banking floor, and outer dome above 2nd floor. Brick stone faced walls. Tile floors and roof.

20. Outstanding example of Beaux-Arts Styling in the City of Buffalo. Buffalo

21. SOURCES: Savings Bank was established in 1846. In 1852 it was located on the west side of Main Street near Court St. This building was demolished in 1865 after a fire. The Bank (Buffalo City Savings Bank) then moved to the northeast corner of Washington and Broadway until the present structure was completed. The Gosvenor

22. THEME Library was located at this site in 1870. The Bank building cost \$450,000, and the five story addition engineered by Phillip Duchscherer cost \$650,000. The triangular shape of the building results from Joseph Ellicott's street plan for Buffalo with streets radiating from a circle, namely Niagara Square.

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Good example of the Art Moderne Style. Rear part of building was built in 1909, the Seventh-Tenth floors were built in 1947-8. Important contributing building in the streetscape of lower Main Street.

21. SOURCES:

Buffalo City Sanborns, 1925

22. THEME:

Commercial-Art Moderne

20. Excellent example of the commercial style as it was built in Buffalo in the late 19th century. Originally known as the Mooney and Brisbane Building. Originally had a court with a glass paneled roof in the second story between the east and west wings. The arcade Building was previously on this site. One of six buildings that face Lafayette Square, an important open space in Buffalo's downtown commercial retail district. Lafayette Square is a city landmark.

Lafayette Hotel

72-8

20. Excellent example of the Renaissance Revival Style as it was adapted to commercial buildings around the turn of the century. The opening of the Lafayette Hotel was planned to coincide with Buffalo's 1901 Pan American Exposition, but the hotel was not actually completed until 1904. It was designed by the Buffalo architectural firm of Bethune, Bethune, and Fuchs, the firm with which the distinguished pioneer woman architect, Louise Blanchard Bethune, was associated. The Lafayette Hotel reigned for years as the luxury hotel of the area. In fact, in its heyday it was considered to be one of the finest hotels in New York State, including many innovative features in its design. Historically, it must be noted that in 1969, the Buffalo and Erie County Historical Society placed a marker on the hotel recognizing the fact that Quota International was founded on the site in 1919. Wanda Frey Joiner, a local business woman, was responsible for this trendsetting organization of executive women which has flourished since its founding. The Lafayette Hotel was always a popular meeting place. In its time, the Lafayette counted several notable statesmen among its guests.

The interiors of the hotel were custom designed by Duryea and Potter of N.Y., N.Y. This firm designed all the original light fixtures, carpets, and draperies.

The carriage entrance was on Washington Street where the frontage was 122 feet, with 147 feet on Clinton Street. The original lobby was 72 by 84 feet and was finished in Numidian marble and mahogany. There was a telephone in every room as well as hot and cold water, and a bath between two rooms.

In 1908, only four years after the opening, the Lafayette management bought the lot back of the original structure on Clinton Street and extending 250 feet on Ellicott Street, a site larger than that of "the old french church" first bought for the Lafayette. The hotel was then doubled in size in 1912. Shortly after, the heating and power plant was moved to a separate building on the Ellicott Street side. The ballroom was added in 1916. The third addition was made to the Lafayette in 1925 when a lot was purchased south of the hotel giving fifty additional feet on Washington Street. The ground floor of this addition was originally used as a billiard room but in 1934 the space was remodeled into a taproom.

Modernization of the lobby began in 1941 which made possible the addition of a modern drugstore, a gift shop, and a travel bureau. In 1952, preparatory to the renovation of the guest rooms, modern windows were installed throughout the hotel.

Louise Blanchard Bethune was America's first professional woman architect. At age twenty she received an offer for an office as a draftsman with the Buffalo firm of Richard A. Waite. For five years between 1876 and 1881, she continued as Waite's student and assistant, spending part of the time also with architect F.W. Calkins of Buffalo. The apprenticeship was productive, for Louise Blanchard not only mastered the techniques of drafting and the art of architectural design, but met in Waite's office her future husband, Robert Armour Bethune. He came from Canada and had begun his work as a draftsman with Detroit's pioneer architect, Gordon Lloyd before venturing to Buffalo. They soon decided to get married. In October of 1881 they opened the Architectural firm of Bethune and Bethune. In 1888 Louise Bethune was admitted to the American Institute

Page 2  
391 Washington Street  
Lafayette Hotel

72-8

of Architects as the first woman associate. As early as 1890, with the admission of the architect, William L. Fuchs, to the firm, Louise has indulged in a semi-retirement, continuing as more or less a silent partner in the concern now known as Bethune, Bethune, and Fuchs. In 1898 they were invited to plan the 225 room Hotel Lafayette that would, it was hoped, house visitors to the Pan-American Exposition of 1901 in Buffalo.

18. — trefoil motifs. Pedimented wall dormers have round arched windows with side pedimented piers. Slender rectangular window in gable. Projecting end bays have pyramid roof topped by crocket. First floor echoes center bay except for pediments over windows. Second and third floors echo main facade. Gothic arched arcade in fourth floor and straight headed windows with transom. Pedimented wall dormers topped by crocket have gothic arched panel with paired gothic arched windows. Tympanum decorated with quatrefoil medallion. North and south side have pedimented central bay. Central entrance has engaged piers with foliate capitals. Archivolts decorated with foliate forms. Tympanum decorated with foliate quatrefoil. Gothic arched windows flank. Echo main entrance except for single light windows and circular window in tympanum. End pedimented niches. Balcony has rectangular balustrade. One third floor is balcony supported by paired brackets. Gothic arched arcade has paired gothic arched windows with tracery and trefoil medallion in tympanum. Gable has arcade. Top of gable has rosette window. Crocket topping. Porte cochere on east side has corbelled pyramid piers. Frieze decorated with rosettes and balcony balustrade of cut-out quatrefoil.

20. Outstanding example of High Victorian Gothic Style building in the City of Buffalo. Unique building in city. Built in 1894-1901 and designed by James Knox Taylor, the Old Post office is a local masterpiece of late Victorian public architecture. The building was recorded by Historic American Building Survey. The post office was abandoned in the late 1960's and is presently being rehabed for use as the Erie Community College's downtown campus.

The Post Office cost two million dollars. A special commission was organized to chose the site which cost \$476,250.00 and was purchased on February 6, 1892. The rest of the two million dollars was appropriated for the 5 story building and work began Sept. 6, 1894. Built of pink Maine granite the building was dedicated on March 20, 1901. To the Buffalo residents at the time it was regarded as a symbol that Buffalo had really become a first class metropolis. The dedication program stated "With the completion of the United States Post Office in Buffalo, another ornament in architecture has been placed in the city for the admiration of future generations, and another monument erected to the energy and patriotism of the men who fashioned the affairs of Buffalo during the closing years of the past century. In point of size, beauty, and cost, it far surpasses any public building in Buffalo or Erie County, and as one of the largest and most completely equipped buildings ever erected by the United States Government for a like purpose."

The building was used without major changes in its construction until 1936 when a \$200,000 remodeling job provided office space and modernized some of the fixtures.

Originally planned to be four stories the plans were later changed by adding a fifth story. In the fall of 1896 the contract for the entire superstructure was let to John Pierce of N.Y.C. The first floor and a portion of the basement was used for postal business. The second, third, and fourth floors were used by the United States Court rooms, the U.S. Engineer, Lighthouse Board, Inspector of Steam Vessels, Inspector of Hulls and other U.S. Government officers and departments.

George Metager was superintendant of construction from April 9, 1894 until

20.——continued—— January 3, 1899 when he resigned and E.A. Kent was appointed his successor.

Former Congressman Lockwood and Mahany did most of the work of setting the appropriations through Congress. The specific roles played by several architects in the final design of the post office is unclear. Willoughby J. Edbrooke and William Aiken are mentioned in some historical sources, though James Knox Taylor is generally given principal architectural credit. Taylor later designed the government buildings at Buffalo's 1901 Pan-American Exposition.

The cornerstone was laid June 19, 1897, the Postmaster-General dedicated the building in 1901 by mailing the first letter to President McKinley.

The steel frame is clad in reddish Mainie Granite. The Gothic tower is 244 feet tall. In the interior, four stories of open arched galleries are placed on the north and south sides of a dramatic skylit central court, which measures 117 feet by 184 feet. Buffalo's main postal facilities were removed to the new location on William Street in November, 1963. Since that time the downtown structure housed only a small branch office. In 1971, the building was listed on the National Register of Historic Places. The Post office is now being renovated for use as Erie Community College's downtown campus. The building would be the center for the college's administration, auditorium, student activities, classrooms, faculty offices, laboratories, and library for 2,000 full time students.

18. continued— pattern. First and second floors are ashlar block faced. Cornice with wave molding above third floor. 3rd floor has tripart windows with rope molding surround. 1st and 2nd floor windows have metal enframement with cresting in 2nd floor. "U" shaped building from fourth floor to twelfth. Concrete floors and roof. 12" tile brick faced curtain walls, tile partition walls, 126,000 S.F.

20. Good example of the type of high rise buildings with classical styling that were built in downtown Buffalo in the 1920's. Harry Walbridge (for whom the building is named) was born in Buffalo in 1891. Along with his brother Charles E. The Walbridges formed a hardware business. Harry was an invalid for years but this did not curtail his role in the business. George B. Walbridge, Harry's son who was also

associated with him in the business, was responsible for the move from Main Street to this location. He planned the Walbridge Bldg. primarily to accommodate the hardware firm. It occupied the basement, 1st, and 2nd floors with a suite of executive offices on the third floor. In addition the building contained 260 offices. The original cost of the building was \$1,500,000.

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:

(Indicate if building or structure is in an historic district)

Among commercial and residential hotel buildings of Delaware Avenue. Delaware Avenue was once the most prestigious residential street in Buffalo. This section was commercialized around 1900. Part of the heavily built up downtown commercial district of Buffalo.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

Two story commercial building with Neo-Classicism Styling. Flat roof. Cornice has dentils. Metal pilasters across front have urn and scroll carvings in capitals. Second floor has single light, transomed windows with metal paneled aprons. Rounded cornice. Entrance on west side has glass paneled door, transom, cornice with scallop shell cresting, and pilasters with ionic capitals. Some storefronts have scallop shell cresting in cornice.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: c. 1920

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Good example of the type of Neo-Classical styled storefronts that were built in Buffalo in the 1920's. Similar styled building is on the northwest corner of W. Chippewa and Delaware Avenue (232 Delaware, 76-18) This section of Delaware Avenue was originally all residential with commercial development starting in the early 20th century.

(Indicate if building or structure is in an historic district)

Among commercial, governmental and a few residential buildings of Delaware Avenue which is part of the downtown commercial district in this section. The area is characterized by tall buildings, built close together and a few parking lots. Delaware is a main street in Buffalo.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

Two story commercial building with Neo-Classical Styling. Flat roof. Cornice has acanthus leaf modillions, egg and dart molding, and dentils. Paneled frieze has talon molding and patera decoration. Cornice above second floor has triglyphs alternating with pateras. Corner pilasters are paneled with talon molding. Single light second floor windows have transoms. Scroll brackets at corners of second floor windows. First floor storefront altered. Brick and tile construction.

19. DATE OF INITIAL CONSTRUCTION: c. 1920 \_\_\_\_\_

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Typical commercial row building constructed at this time with styling derived from Neo-Classicism. It originally had a tailoring business and later housed a club when its name became the Variety Club Building. It presently has a printing business. Delaware Avenue in this section was residential until around the turn of the century when commercial development began.

Victorian Gothic Styling

## 339 Delaware Avenue, Asbury Delaware Methodist Church

20. Excellent example of a Victorian Gothic Style church. Asbury Methodist Church was organized on March 24, 1847 and merged with Delaware Methodist Church in 1917, the former congregation moving into the latter's building on Delaware Avenue. Delaware Methodist Church was organized on October 18, 1870 and has always occupied the site of the present church, with the exception of the period of construction. Cornerstone of the present church was laid on September 10, 1874 and the church was dedicated on September 10, 1876. The church was constructed of Medina Sandstone with Connecticut Brownstone trim. The interior is noted for its original Victorian Gothic character which is almost intact complete with gallery, mahogany and rosewood furniture and woodwork, partly gilt truss ceiling and grisaille stained glass windows. The exterior is noted for its north tower, built completely of stone. Delaware Avenue became the city's most prestigious street in the late 19th Century with most of the city's large residences being built on the street. Starting in the early 20th Century apartment and commercial buildings replaced many of the residences.

19. DATE OF INITIAL CONSTRUCTION: c. 1888

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Good example of the Queen Anne Style as it was built in Buffalo using brick. However the building has been extensively altered from its original design. Lathrop was the owner in 1891. One of the last remaining residential houses that was built in downtown Buffalo in the nineteenth century. Delaware Avenue was originally all residential with commercial development starting in the early 20th Century. Delaware Avenue became the city's most prestigious residential street in the late 19th Century with most of the city's largest houses being built on the street. The building is now being used as a restaurant.

(Indicate if building or structure is in an historic district)

Hutchinson Technical H.S. is located across the street. Parking lot is on the north side of the building. West Village Preservation District is on the west side of Elmwood Avenue. This section of Elmwood is mixed with commercial and residential buildings.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
 Two story with gable roof. Two story rounded arch panels. Center glass paneled door with sidelights. To right is single light window with sidelights and lighted transom. To left is entrance with wood and glass paneled doors, sidelights and transom. Second floor over entrance is round arched window. Two sashes with nine lights each, and semi-circular transom. End bay windows echo this on a smaller scale. Round window in gable. Dentils under eaves.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION c. 1888

ARCHITECT \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

This is the oldest Veterinarian Hospital in the City of Buffalo. The building has been altered and lost most of its architectural significance. Sherman S. Jewett of Sherman S. Jewett Co. was the owner in 1891. He was a manufacturer of store and holloware, and also the President of the Bank of Buffalo. He lived at 256 Delaware Avenue in 1891. This section of Elmwood was originally called Morgan Street and only went up to Chippewa Street. In the late 1890's Elmwood Avenue was extended from Virginia to Chippewa and Morgan Street was renamed South Elmwood Avenue.

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

18 continued-----and weather forms. Fourth floor windows flanked by stone fluted pilaster strips with Ionic relief carving in capital. Variegated parapet at roof. Steel joist construction, brick and tile walls. Concrete floors and roof. 4" gypsum partitions between stores.

20. Excellent example of the Art Deco Style. Best example of an Art Deco Style commercial building in the City of Buffalo. Delaware Avenue became the city's most prestigious street in the late 19th century with most of the city's largest residences being built on the street. Starting in the early 20th century, commercial and apartment buildings replaced many of the 19th century residences.

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS.

(Indicate if building or structure is in an historic district)

Among commercial buildings of upper Main Street. Within Buffalo's Entertainment District. Studio Arena Theatre is directly next door to the north. A parking lot is directly next door to the south. This section has suffered a decline with many buildings vacant and in poor condition. Part of the downtown commercial district which is characterized by tall buildings built close together, and parking lots.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
Six story commercial, style with classical styling. Flat roof. First floor storefront. 2nd to 6th floors have tripart double hung windows with cast-iron enframement. Spandrels decorated with stylized triglyphs and guttae. Consoles over sixth floor windows. Entwining molding enframes bays. Frieze decorated with fruit carvings and panels. Guttae below. Modillions under crowning cornice. 46,000 S.F. Tile brick faced curtain walls, tile and concrete floors, gypsum partitions.

19. DATE OF INITIAL CONSTRUCTION: Built 1908  
ARCHITECT: Esenwein and Johnson  
BUILDER: Byers

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE

Excellent example of a commercial style building with classical detailing. Best example of the Commercial Style within the Entertainment District. This section of Main Street developed around the turn of the century with many of the buildings having classical styling. Many of the buildings on the 600 block of Main Street have been acquired by the city in order to stabilize the buildings and find suitable developers. It is hoped that the Entertainment District will once again become a vital business and entertainment center of the city.

## STATEMENT OF SIGNIFICANCE

### Areas of Significance:

Architecture  
Music  
Theater

A flamboyant product of the first motion picture boom in the "Roaring Twenties", Shea's Buffalo Theater designed by C. W. and George Rapp is a prime example of the big city movie palace complete with opulent marble and mirrored interiors, gilt furniture, mammoth chandeliers and a grand old Wurlitzer theater organ.

"The Buffalo" reflects a new type of theater under construction throughout the United States in response to the lucrative motion picture industry of the 1920s. Wayne Andrews writes about the architectural innovations allowed by the new medium of the movie:

In these theaters for the first time the eye and ear of the observer were freed from the limitations set by actors' voices and their size on stage. The house audience could be immense. But the most significant new aspect of movie theaters was the appearance chosen, the impression to be made. They were often designated as treasure palaces, their interiors heaped high with exotic plaster riches.<sup>1</sup>

At the time of its completion in 1926, "The Buffalo" was regarded as the pinnacle of Michael Shea's career. This magnate of the early 20th century entertainment world was born in 1859 in Buffalo of humble origins. Seventy-six years later with the construction of "The Buffalo", Shea had built for his own hometown a two-million dollar "wonder theater" for everyone to enjoy. All Buffalo was invited in to ogle at the theater's splendor. Advance publicity of the opening boasted:

#### THERE'S ROOM FOR ALL

WE'VE MADE THIS THEATRE TREMENDOUS IN  
SIZE AS WELL AS OVERWHELMINGLY MAGNIFICENT IN DECORATION! IT WILL HUSH  
YOU, AWE YOU, STAGGER YOU ---

#### AN ACRE OF SEATS

THE MIGHTIEST SIGHT WITHIN FOUR WALLS  
IN ALL AMERICA WILL BURST UPON YOU  
WHEN YOU STEP INSIDE OUR COLOSSAL NEW  
THEATRE!

<sup>1</sup>Wayne Andrews. Lost New York. (New York: Schocken Books, 1971). pp. 81-8

Everyone could afford the price of admission. There were no reserved seats and little cultural pretension at Shea's Buffalo; the emphasis was on dazzling trappings and popular programs.

The man behind the theater, Michael Shea, grew up in Buffalo's first ward, the son of Irish immigrants, Daniel and Mary Griffen Shea. He first worked as a dock laborer and later as a structural iron worker and embarked on building his theater empire at the age of 23. His first venture was the Shea Music Hall in the Old Arcade Building on Clinton Street in Buffalo which was gutted by fire a year later. In the following years, Shea established two more theaters and in 1905 opened the Shea Court Street Vaudeville Theatre which led to the growth of his reputation in entertainment circles beyond Buffalo. The Hippodrome was Shea's first movie-house in Buffalo; and by the second decade of the twentieth century, Shea's investments began to spread beyond his chain of Buffalo theaters to Toronto.

In choosing an architect for his greatest triumph, "The Buffalo", Michael Shea hired the celebrated team of movie palace architects, C. W. and George L. Rapp of Chicago. Rapp theaters were known from Baraboo, Wisconsin to Chatanooga, Tennessee; but the firm's three greatest achievements according to Motion Picture News of December 25, 1926, were the Paramount Theater in New York (now altered beyond recognition), the Oriental in Chicago and Shea's Buffalo Theater.<sup>2</sup>

The year-long construction of "The Buffalo" was carefully chronicled in the city's newspapers throughout 1925. In January, Michael Shea was photographed ankle deep in snow on the site trying to break ground with the traditional spade. In April, the first steel column of the new Buffalo theater made news; and by June, the steel skeleton was nearly completed. With a Chicago architectural firm and a Buffalo contractor, John Gill and Sons, the finished theater was the combined product of technical expertise and materials from both cities. The terra cotta for the Main Street facade came from an architectural terra cotta firm located at 203 South Dearborn Street in Chicago. The interior decorations were done primarily by William Hengerer Company of Buffalo, while the lighting fixtures were the exclusive domain of Victor S. Pearlman and Company of Chicago. Heating and plumbing contracts went to George H. Drake, Inc. of Buffalo. Another local enterprise of international fame, the Rudolf Wurlitzer Company was responsible for the mammoth theater organ which was built at the time of the building's construction with pipes ranging from the size of a straw to 32 feet in length.

C. W. and George L. Rapp's movie theaters were widely acclaimed in their day as "outstanding architectural creations" of the motion picture industry. Likening these splendid theaters to Roman amphitheaters and "Temples of Old", P. G. Carlson wrote in 1928 in Theatre Management about the sumptuous interiors of Rapp theaters, "other theatres of course, may have all these colors,

<sup>2</sup>"Ultra Modern Theatres", Motion Picture News - December 25, 1926. n.p.

but once a theatre built by the Rapp family is seen, there can never be any doubt as to the style they affect."<sup>3</sup>

Fifty years later, these sensational movie theaters have become rare monuments in urban downtowns. They have disappeared at an alarming rate or have suffered drastic interior renovations to simplify maintenance. "The Buffalo" has been spared this fate despite the presence of the same economic forces. The building was sold by Shea's Public Theater chain to Loew's Theaters who more recently sold the building and continued to rent it. In December 1974, the theater fell into the city's hands through foreclosure when the former owner failed to pay back taxes. A non-profit group known as "Friends of Buffalo" is seeking an arrangement with the city to handle the maintenance of the building while Loew's continues to rent it.

One of the best preserved big city movie theaters of its vintage, "The Buffalo" still contains an overwhelming amount of its original decor. It is representative of the most lavish of Rapp and Rapp's commissions and is a priceless record of an exuberant period of American history.

<sup>3</sup>P. G. Carlson "In the Motif of the Ancients: A Firm of Chicago Architects Lean Upon the Splendors of Old to Build the Motion Picture Theatre of Today." Theatre Management - January, 1928.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

Three story commercial row building. Flat roof. Second floor center bay has rectangular straight-headed windows, two sash with transom. Stone lintel and quoins. Third floor center bay has long rectangular openings. Paneled bottom half with transom. Stone lintel and quoins enframe. End bays of second and third floor have tripart double hung windows. Stone lintel and quoins. End quoins. Entablature has triglyphs, metopes, and guttae in frieze. Fire proof construction, concrete floors and roof, 12" brick walls.

19. DATE OF INITIAL CONSTRUCTION: c.1905

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Good example of a commercial row building with classical styling. This section of Main Street developed around the turn of the century with many buildings being classically designed. 621-623 Main Street, directly next door to the south is also owned by the City Of Buffalo. Many of the buildings on the 600 block of Main Street have been acquired by the city in order to stabilize the buildings and find suitable developers. It is hoped that the Entertainment district will once again become a vital business and entertainment center of the city.

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Typical example of a commercial row building with cast iron lintels that was built in Buffalo in the late 19th Century. Many buildings on this section of Ellicott have been torn down for parking lots, thus losing the tight commercial streetscape that once existed. Dwelling in rear was formerly 439-441 Ellicott. Anthony Settenberg was the owner in 1872.

Religion, Romanesque

649 Washington Street  
80-15  
St. Michael's Roman Catholic Church

20. Good example of a church with Romanesque Styling that was built in Buffalo at this time. The first mass for the proposed St. Michael's congregation was in the basement of St. Peter's Church on 5/18/1851. The land for St. Michael's, which previously was a part of Squier's Lot was donated by Bishop Timon with the provision that a church and a college ( which became Canisius College) be built here. The first church was built in 1852. The present church was built in 1866-67. It cost an estimated \$120,000.

On May 23, 1962 the church was hit by lightening and burned to a shell. The exterior walls remained and the church was reconstructed. The top part of the tower was replaced with one which was smaller than the original. The architect for the reconstruction was Roswell E. Pfol of Pfol, Stoll, and Roberts. Pfol had been a parishioner of St. Michael's for 60 years. He was responsible for the renovation which occurred the year before the fire. Siegfried Construction Co. Inc., and Arthur Boneberg, job superintendants, worked on the reconstruction. Statuary for three green marble alters was carved by John D'Archangelo. The cost of the reconstruction was estimated at \$1 million.

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:  
 (Indicate if building or structure is in an historic district)

Two story commercial building lies among other commercial structures of Elicott street. This section is part of the downtown commercial district which has buildings built close together and parking lots. Buffalo Savings Bank parking lot is across the street. Parking lot is on the north side of the building.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
 Two story commercial building. Flat roof. First floor storefront has center opening to courtyard. Garage door to far left. Glass paneled doors with transoms. Entwining molding surrounds windows. First floor cornice. Stone banded piers. Second floor has straight headed windows with stone keystone and voussoirs. Corbel panel below metal crowning cornice/

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: \_\_\_\_\_ c. 1900

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Typical example of a two story commercial row building that was built in Buffalo around the turn of the century. One of the five commercial row buildings that still remain directly next door to each other. Many buildings on this section of Ellicott Street have been torn down for parking lots, thus losing the tight commercial streetscape that once existed.

City Landmark Application**

22. THEME:

**Religious**

20. The Congregation of Trinity Episcopal Church, second oldest in Buffalo, moved to its present site on 1884 when it merged with Christ Church (built 1871) on a plot adjacent to today's church. The Church commenced with the laying of the cornerstone on July 22, 1884 and was opened for services on Easter Sunday, April 25, 1886. It is built of Medina sandstone. The green between the chapel formerly the Christ Church, and the church is notable for its free standing Celtic cross of granite.

The windows of the church are of particularly great historical value in the history of American art. The five chancel windows surrounding the main altar of the church are by John LaFarge, as are those windows of the Memorial Chapel at the left of the main altar, which is the example of LaFarge's work in North American. These windows were exhibited in Paris in 1889. Several windows on both sides of the Church are early work of Louis Comfort Tiffany. Altogether there are five Tiffany windows in addition to ten works of LaFarge in the main church building.

Second window from the rear of the church is given in memory of William G. Fargo, founder of Wells Fargo and Company. Christ chapel adjacent to main church was built in 1870-71 after plans were drawn up the year before by architect Arthur Gilman. It was originally the church of the Congregation of Christ Church and became a chapel in 1886, after the main church was erected.

In 1913 it was redesigned by Bertram G. Goodhue of New York. Goodhue along with his partner Cram, were the greatest Gothic architects of this century. Notable features from this redesigning include a polychromed ceiling, altar piece and baptismal font. Another feature of the chapel is its organ of twenty-six pipes built by the Schlicker Organ Company of Buffalo in 1951.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION **c. 1878**

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**The existing structure is now used for a dental lab. Formerly it was part of Le Couteulx St. Mary's institution, for the improved instruction of Deaf Mutes, located at 125 Edward. The school was started in 1857 by Sisters of St. Joseph who taught in 3 wood frame cottages on land originally donated to the Catholic Diocese by Louis Le Couteulx. In 1862-1863 a four story brick building was constructed on the same site. In 1899, the school was moved to Main Street.**

17 INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS.

(Indicate if building or structure is in an historic district)

**Within Allentown Preservation District, both the local and proposed National Register. Commercial Delaware Avenue lies to the east, the Buffalo Club, an exclusive men's club lies to the south, residential building lie to the north and residential, educational and religious buildings lie to the west.**

18 OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**Four story brick with Federal and Italianate Styling. Three pavillion sections with hipped roofs have flat headed six over six light windows with stone lintels and sills and doorways with stone lintel and transom. Connecting sections have gable roofs, segmental arched six over six light windows with splayed brick and stone sills. Rock faced stone basement. Two story extension on the rear of the left side.**

**SIGNIFICANCE**

19. DATE OF INITIAL CONSTRUCTION: **c. 1863**

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20 HISTORICAL AND ARCHITECTURAL IMPORTANCE

**Unique building in the city of Buffalo. Unusually large educational complex in Buffalo at its time of construction. Built on land donated to the Catholic Diocese by Louis LeCouteloux by the Sisters of Saint Joseph, the building housed St. Mary's Institution for the Improved Instruction of Deaf Mutes from 1863 to 1899. At that time the "Flat Iron" as it was nicknamed was converted to apartments.**

- 17 INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS.

(Indicate if building or structure is in an historic district)

**Located in local Allentown Preservation District. Among residential structures that have been altered to business and apartments on Franklin.**

- 18 OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
**Two story Italianate Style. Flat roof. Entrance portico has fluted Corinthian columns supporting round arches with keystone. Dentils and modillions under porch eaves. Single door with glass panel has elliptical fanlight. Segmental arched window, double-hung with one over two lights. Second floor windows have end corbels. Brackets support projecting eave.**

SIGNIFICANCE

- 19 DATE OF INITIAL CONSTRUCTION: **c. 1867**

ARCHITECT \_\_\_\_\_

BUILDER: \_\_\_\_\_

- 20 HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**Fine example of Italianate Styling. The delicately designed porch enhances the building's character and distinguishes it from other buildings of the same style on the block. The original owner was Paul Park, a lumber and shingle dealer with business at 23 Wilkeson. (wholesale and retail)**

The Industries of Buffalo, 1887, The Elstner Publishing Co.  
"St. Louis Church, Bflo., NY, George Vosaler  
Courier Express Article 11/78**

20. Unique church in the city of Buffalo. Outstanding example of Gothic Revival architecture in Western New York. The 175 foot spire is unique in region and an unusual example of local nineteenth century stone cutting. The rock faced Medina sandstone is a material not particularly appropriate for Gothic churches, but much in vogue during the 1880's when the Romanesque Revival of HH Richardson was at its height.

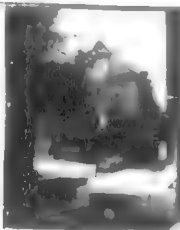

St. Louis has been described as bearing a striking resemblance to the cathedral of Cologne. The church has also been described as a nineteenth century version of thirteenth century Gothic Church with German Gothic overtones, especially in the open work spire which echoes those of Freiburg-im-Breisgau and Ulm in its style and location in reference to the body of the church.

St. Louis Church is the mother church of the Roman Catholic Diocese of Buffalo and has occupied the same lot since 1832. Louis LeCouteloux, a former french count, was a settler in Buffalo, and in 1828 Reverend Stephen Badin, a missionary stayed with LeCouteloux at his Main and Exchange Street home. While visiting the missionary successfully convinced LeCouteloux to donate some of his land for a church, rectory, school and orphanage. In 1832, a small frame church, named "Lamb of God" was built at the Main and Edward Street site. This was replaced in 1843 by a larger brick church and renamed "St. Louis" in tribute to LeCouteloux after the french king, Louis IV.

Bishop J. Hughes of New York City put the church under an interdict in 1843 over a quarrel with the Board of Trustees over parish administration and it wasn't reopened until 1855. In 1855 the church burned and the present building was constructed and opened in 1889. The architectural firm that designed it was Schickele and Ditmas of New York City and it cost \$265,000 to erect, exclusive of interior furnishings. The congregation was originally made up of French and German settlers.

St. Louis Church is the only independent church in the eight County Buffalo Diocese due to a provision in LeCouteloux's will. The will states that as long as the land is owned by the parish the property stays in their hands. If the property is ever deeded anyone else the descendants of LeCouteloux could regain ownership.

17 INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:

(Indicate if building or structure is in an historic district)

Faces Old U.S. Post Office. Surrounded by parking lots, vacant land, and commercial buildings of Swan Street/ The Thruway lies to the south. Part of the downtown commercial district which is characterized by tall building built close together, and parking lots. This section has had extensive Urban Renewal.

18 OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

Six story commercial building with classical styling. Flat roof. Projecting cornice has metule blocks, triglphs, metopes and guttae. Brick pilaster strips with crest motif in capital. Tripart windows with single light, double hung sashes, and brick spandrels. Metal cornice above first floor. Front wood double doors with elongated lights and multi-light transom. Plate glass first floor windows with transomes and metal aprons. Concrete floors and roof, brick and tile walls, 3 wired glass skylights.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION:

Built 1910

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Good example of the commercial Style as it was built in Buffalo in the early 20th Century. Swan Street was once a thriving business section of the city. The area has suffered a decline with many of the commercial structures being torn down for parking lots and the Elm-Oak arterial. Building is currently the Niagara Apparel Co. Inc. factory building.

# MUNSCHAUER,

Water Coolers, Filters, Baths, Coal Hoists, Men's Sleighs, etc.—Corner Randall and

The large and handsome three and four-story factory illustrated herewith was built by its present occupants in 1884 and is of brick throughout fronting 102 feet on Superior street and 250 feet on Randall, with a convenient lumber yard, 55 by 125 feet, lying on both sides of Randall street. The entire establishment is a live industry from basement to roof employing 180 workmen in the various departments and a complete, novel and costly equipment of machinery, much of which was specially designed and constructed for these works.

A wide range, embracing complete lines of refrigerating machinery, water-coolers of approved styles and all kinds of coal vases, children's sleighs, and bird cages of all kinds, sizes, grades and prices, is the United States.

It was founded in 1865 by Messrs. Gesellgen, Heintz and small way on Mechanic street. The firm became in 1873 removed to Hanover street, then to Mr. Pierce retiring in 1878, since which time it conducted the business without change of firm name, new factory and a triplication of the volume of work and town in the Eastern, Western and Northern

acted as partners in the flourishing Niagara Steam Press across the street. Mr. Heintz is a practical workman, a German by birth, and came to Buffalo in 1861, served in the Union navy in the war of the kind of business for the past nineteen years.

# L. GEORGER,

Varnishes, Artists' Materials, Painters' Supplies—No. 246 Washington St., Opposite

of all kinds for exterior and interior use is customary, as formerly, for each member of the family, and oils, since he can save time and money, and so, from those who make a business of it, and successful men in this branch of the trade. On Washington street, opposite the post office, where he is a pleasant and obliging gentleman. He calls and inspect his large and valuable stock for house, steamboat and sign painting and for Cornell's and Pittsburg white lead, Devco and shellac, spirits turpentine, naphtha, gasolene, kerosene, oil, dry colors, colors in oil and distemper, vermilion, whiting, putty, window glass, polishes, painters and artists' supplies generally. For several years, and is making a fine reputation with

# McDONNELL & SONS,

Quarry Owners and Manufacturers of Monumental Statuary and Artistic Memorials and Building Work—Works and Quarries at Quincy, Mass.; Branch Office and Yards, Nos. 858 and 860 Main St., Buffalo.

One of the best examples ever presented of what may be accomplished by pluck, industry and square methods is found in the career of the above firm. Patrick McDonnell, a wide-awake young Irishman, came to America at the age of 17 with a sovereign in his pocket, found his way to the town of Quincy, Mass., and entered the service of Thomas Drake, stonemason, as an apprentice. When his time was out he steadily wrought as a journeyman for his former master, until he had accumulated a small capital, when he purchased a partnership in the business and became in his turn an employer. A

few years later he found himself sole proprietor of a flourishing granite works, and has had the satisfaction of seeing it expand into one of the most extensive, valuable and profitable plants of the kind in the United States. His two sons, Thomas H. and J. Q., he carefully trained to the same vocation, and at this time their quarries in all over thirty acres of the best granite ground in Massachusetts, fifteen acres of which belong to the father and fifteen to the sons. Besides the quarries the equipment of steam engines, drills and other appropriate machinery for operating them is very complete and effective, and some of it, specially constructed for the use of the firm, quite costly, yet necessary, since McDonnell & Sons, in addition to their monument interests, do more in finished and building granite than any other Quincy house. One of their derricks alone is capable of removing a hundred ton block at a single lift, and 80,000 feet of lumber is annually consumed in boxing goods for shipment. Some 150 hands are employed, and it takes \$6,000 a month to pay for labor at the quarries and yards. A strong force of blacksmiths is required to keep the tools in order.

The very noticeable advance in public and private taste, developed during the past few years in Buffalo, induced the firm to open a branch office and works at Nos. 858 and 860 Main street, in August of 1884, and it is safe to say that the venture has proved a successful one. The premises are 50 feet front by 100 feet deep, and are stocked with a splendid exhibit of fine monumental work, the office itself, with its beautiful and elaborate polished Quincy granite front, being the handsomest in the United States—a recognized work of art that attracts the attention of every passer-by and excites admiring comment from all. Our cut gives a fair notion of its appearance.

Among the more conspicuous examples of McDonnell & Sons' work in this vicinity may be mentioned the magnificent canopy at Forest Lawn cemetery, which cost \$20,000, the Michael monument, and others of greater or less note.

The C. W. Mackey family monument at the Franklin (Pa.) cemetery is a superb work, completed last September. The Franklin News says of it: "This monument—the work of McDonnell & Sons—stands conspicuous among the elegant works in that beautiful spot, for the harmony of its proportions and the elegance of its workmanship. It is of Quincy granite, polished throughout above the bottom base, its surface having that perfect and flinty glaze which only Quincy granite takes on. The base is 6 feet square; the die is 8 feet at its base and 8 feet 7 inches high, and is capped with an artistic design that greatly adds to the completeness of the work; the solid shaft is about 15 feet in length, and the entire height of the monument to the pyramidal apex about 38 feet."

The Seventy-seventh Regiment monument at Saratoga, the Shoemaker monument, Spring Grove cemetery, Cincinnati, and hundreds of other striking specimens of their handiwork on a large scale, might also be referred to did space permit.

The house was established in 1857. The elder Mr. McDonnell has retired from active business, Mr. Thomas H. McDonnell directing operations at Quincy, while John Q. has charge of the Buffalo branch. A magnificent line of fine monuments and headstones, from novel and original designs, are constantly kept in stock, and challenge the visitor's admiration.

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**18 cont'd on attached sheet.**

**20. Unique styled apartment and commercial building in Allentown. Romanesque Styling combined with unique terra cotta detailing give it individual distinction. Named the "Red Jacket" after the famed Indian Chief of Western New York who gave invaluable assistance to early settlers and was a noted statesman for his people. The Humbach Drug Store occupies a commercial front has been located here since 1920's.**

21. SOURCES:

**Buffalo City Atlas, 1894, 1915  
Mina Kliman oral tape**

22. THEME:

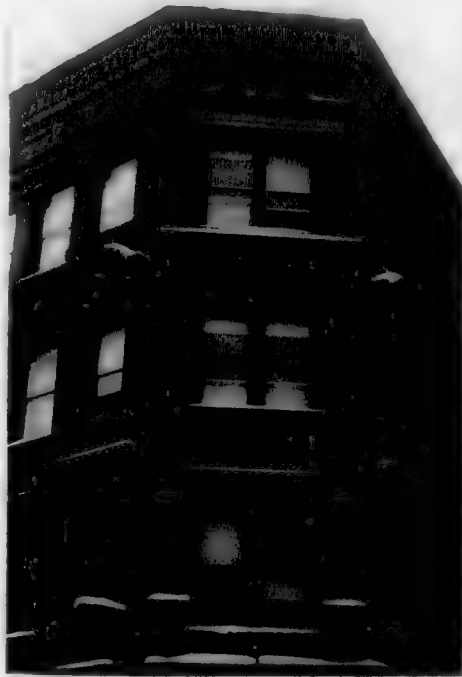

**Noncommercial-Romanesque Style**

18 cont'd

Round arched doorways have pilasters with stone bands, pattered design in capitals and transoms. North side has similar styling. Main and Allen corner faces diagonally out with terra cotta round medallion in fourth floor. Medallion has profile relief carving of Red Jacket and is flanked by a horn of plenty on either side. Terra cotta panel over third floor windows reads "Red Jacket". Terra cotta panel over second floor windows reads "1894" and has swag relief design.

17 INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS

(Indicate if building or structure is in an historic district)

**Located within local Allentown Preservation District. Among residential buildings and commercial businesses housed in the large Victorian structures.**

18 OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**Two and a half story with Queen Anne influence. Cross gable roof. Flat headed windows, double hung single light. Rusticated stone sills. Tripart window on second floor. Wood entablature has ancones and modillions supporting cornice. Dentils under cornice. Gable has tripart window with pilaster strips and entablature. Triglyphs in freize. Entrance has paneled door with segmental arched window**  
**SIGNIFICANCE above and relieving arch with keystone.**

19. DATE OF INITIAL CONSTRUCTION \_\_\_\_\_

**e. 1888**

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20 HISTORICAL AND ARCHITECTURAL IMPORTANCE

**Typical Queen Anne Style influence found in many houses built at this period. This structure was built on original property of Cicero H. Hamlin. Converted to a rooming house in 1920's/. Carriage house at 33 Virginia Place was originally part of the property (see blue form 91-29).**

**THEME: Residential<sup>1</sup>Second Empire Style**

506 Delaware Avenue

Chilion M. Farrar built his Delaware Avenue home in 1876. He was a self made man and attained national leadership in the iron industry having founded the iron works Farrar and Trefts.

The Farrar house is one a very few in Buffalo built with a basement kitchen. A dumbwaiter transported food from the kitchen to the first floor.

A visitor to the Farrar home entered a large hall. On the left was parlor with a fireplace. Another long room opened onto the spacious porch. A third living room, larger than the others, ran the entire width of the house. It had an ample fireplace and an exceptionally large mirror with a walnut frame. Next came the dining room, two conservatories, a breakfast room and a bathroom.

Throughout the mansion mahogany and walnut were used for wall paneling. The walls were covered with brocades, tapestries and other materials rather than paper.

Three generations of the Farrar family lived here until 1916 when it was sold to the Knights of Columbus.

The nine large bedrooms on the second floor were remodeled into a reading room, clubroom, council room, and offices. The third floor was originally a library and three large sleeping rooms. Today these are divided into smaller rooms.

484 Delaware Avenue

The Cornell Mansion was built in 1894 by the S. Douglas Cornell Family and the architect was Edwin A. Kent, of Buffalo.

The four story Frnch Chateausque Style house wi built of light colored limestone. Rare imported tapestries covered the walls of the former library and the first floor woodwork is cherry. The marble mantelpiece above the large fireplace of the living room is inscribed "S. Douglas Cornell, 1894". Above the mantel cherry paneling, exquistely carved, extends to the ceiling.

The entire fourth floor was a theatre complete with stage, footlights, curtain, scenery, and seats for spectators. The Buffalo Amateurs presented four performance each year there.

S. Douglas Cornell's father founded the Cornell Lead Works, now the National Lead Company in which his son later was a partner and finally, active head. After his wife's death Cornell rented the home to Frances Wolcott and later to AG Wright.

Courier Express, 5/18/52

20 cont'd

apparently passed on to his children and grandchildren. His son, Peter Cornell, M.D. developed an interest in the stage and from 1901-1926 managed professional theaters downtown. Peter's daughter Katherine Cornell, who grew up at 174 Mariner, pursued an acting career that won her national fame during the 1920's and 30's. The third floor of the home had a private theater. Lydia Cornell owned the original house which was razed in 1892 so her son could build the present home. During the 1920's the building became a rooming house and then later housed a business. Today it is still used commercially.

22. THEME  
**Residential-Rowhouse**

20. This is the last of the rowhouses to be built being completed in 1895. The twelve rowhouses, unique in the city, were built between 1893-1895 on the side of the Cornell Lead Works Company, razed in 1892. The original owners were Mr. and Mrs. Henry M. Birge who had previously resided at 519 Franklin. During 1895 they resided at the Niagara Hotel while awaiting completing of their home. Later, Henry Birge built a large home on Symphony Circle around 1905. He owned a wallpaper company with offices on Niagara at Maryland. In 1901 John M. Horton bought the house. Katherine Pratt Horton lived in the house from 1906 until her death in 1931. She was active in many Buffalo Women's Clubs. Especially the Buffalo Chapter of the D.A.R. which was at the time the largest in New York State and second largest chapter in the country. She willed the house to the D.A.R. chapter providing the house retained her name. The interior still retains her furnishings. Her grandfather founded Pratt and Letchworth, a paint company and Manufacturers and Traders Bank.

Round arched window in gable, carriage door with stone lintel, and two segmentally arched windows with stone sills to left of carriage door.**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: c. 1865

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

- 20 HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**The carriage house was built for the 472 Delaware Avenue home where Samuel Clemens lived for a year. In 1867 he bought Thomas A. Kennet's shares in the Buffalo Morning Express and in 1869 he arrived in the city to become editor. He moved into 472 Delaware with his wife, and his first child was born there. After about a year he gave up the newspaper business and left the city. The house has been torn down and a garish restaurant has converted the carriage house and made extensive alterations.**

**THEME: Club**

THE UNIVERSITY CLUB  
546 Delaware Ave.

The first annual meeting of the University Club was 12/29/1894 at 497 Delaware Avenue, the home of Harlow C. Curtis. The first clubhouse was opened 3/1/1895 at 884 Main Street, and a second one was 295 Delaware Avenue. In 1903 the club moved to its present location.

Some say it was founded to encourage university men to keep up their traditions, or for development of the higher intellectual life. But it was rumored that the founders were Saturn Club members who became annoyed at the cathedral-like hush of whist games in progress at the Saturn Club and decided to form their own organization (Bflo. Evening News 1/13/64). However, the Club constitution states its objective as:... to promote social intercourse among its members and provide them with the conveniences of a clubhouse containing a library a reading room and other means of promoting science, literature and art.

Prior to the fire in 1974, the clubhouse included thirty-nine permanent residents, four squash courts, a bowling alley, an indoor pool and an extensive library.

The clubhouse has been renovated since the 4/24/74 fire which caused an estimated \$556,000 damage.

20. Renaissance styled rowhouse is a unique feature to Buffalo. Twelve rowhouses built on Delaware Ave. during 1893-95 on the site of the Cornell Lead Works Co., which was razed in 1892. Original owners were Dr. and Mrs. Ernest Wende. Wende was a doctor and Health Commissioner. He was thought to be "the first responsible and effectively authorized health officer in Buffalo", having improved sanitation conditions considerably. In 1893, he started the first bacteriological lab to inspect water and milk. The bay at the basement originally had a leaded glass hood. Since 1920 the building has served as a restaurant

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Unique building in Buffalo, believed to be the earliest surviving house in the city. Originally located at Swan and Pearl it was built by the Coit family who were successful in transportation business and one of the major ships in the harbor was developed by its members. The house was moved in 1870's to make room for a bank.

See attached sheet

THE COIT HOUSE  
414 Virginia Street

This house is one of the twenty or thirty large houses built in the first year or two after Buffalo was burned by the British Army on 12/30/1813. The third floor and the portion of the building to the right of the center hall were probably added in the 1820's.

George Coit was born 6/10/1790 in Norwich, Conn. He came to Buffalo in June 1811 with Charles Townsend and established a drug store on Main Street, which they owned and operated until 1818. They then engaged in the storage and forwarding business, at the foot of Commercial Street, where they erected a large building for that purpose. The partners together with Samuel Wilkeson signed the \$12,000 note which made it possible to begin work on the Buffalo harbor and thus secure the terminus for the Erie Canal in Buffalo instead of Black Rock. After the canal was extended to Buffalo, they joined with Sheldon Thompson and Company, of Black Rock to form the Troy and Erie line, which was very successful.

Coit married the sister of his partner Hannah Townsend on 4/4/1815 and together they had eight children. The family was extremely attached to each other. Their mother, who was entirely devoted to her children, died while they were all quite young. Coit married twice after the death of his first wife, to Mary Smith Atterburg 7/28.1837, and to Emeline P. Martin in 1841.

Coit was prominent member of the Buffalo Historical Society, the Buffalo Board of Trade and the Water Works Company. He belonged to the First Presbyterian Church, Coit died in May 1865.

During the 1870's the Coit house was moved to its present location on Virginia Street.

In 1961 a group of local residents investigated the feasibility of converting the house to a museum. The house was painted and some repairs were made but nothing came of the museum.

In 1966, Herman Schwander, the owner at that time, was brought to court for health violations in the house. Schwander claimed he had no funds with which to fix the property.

The Landmark Society of the Niagara Frontier bought the property in 1970. The building was restored and then sold to a private owner.
